\* goSecurity - Advisory 2010111901 \*  
\*  
\*\*\*\*\*

Software: IceWarp Mail Server  
Date: 06 Dec. 2010  
Affected Versions: 10.1.3, 10.2.0

\*\*\*\*\*  
\* Multiple directory-traversal vulnerabilities \*  
\* in IceWarp Webclient \*  
\*\*\*\*\*

## Summary

-----

IceWarp Webclient is prone to multiple directory traversal vulnerabilities. These vulnerabilities can result in loss of confidential data of IceWarp Mailserver and the operating system.

\*\*\*\*\*

## Details

-----

Input passed via the following parameters is not properly sanitised and can therefore be exploited to browse the partition where IceWarp is installed or the whole system and read arbitrary files on the system.

File: [http\[s\]://host/webmail/basic/index.html](http[s]://host/webmail/basic/index.html)  
Parameter: `_c`

File: [http\[s\]://host/webmail/basic/minimizer/index.php](http[s]://host/webmail/basic/minimizer/index.php)  
Parameter: `script`

\*\*\*\*\*

## Solution

-----

Upgrade to Version 10.2.1
